bwin releases Tournament Poker Clock for iPhone

bwin recently released its first ever tournament poker clock for the iPhone®. The bwin-developed iPhone Tournament Clock is made for organising home games and is currently available for download via Apple's iTunes App Store.

The key software feature is its intuitive interface, making organising private poker tournaments simple, without the need for a PC, MacBook or the internet. The "Quick Mode" allows you to run a tournament straight out of the box. In "Expert Mode", more advanced home tournament organisers can configure the tournament to suit their requirements by inserting pictures of the players and adjusting the blind levels.

"Setting up poker tournaments should be easy and fun, just like the iPhone. We will continue to keep our sights set on bringing the most user-friendly applications to the mobile world for whatever platform people are using", said managing director of bwin Games AB Carl Klingberg.

bwin is a pioneer in developing mobile gaming applications and was the first to offer real money poker against real opponents.
